CLAIMS 1-8,10,12-21,23-25 ADN 27-34 ARE PENDING

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Applicant's arguments with respect to claims 1-8, 10, 12-21, 23-25 and 27-34 have been considered but are moot in view of the new ground(s) of rejection.

In particular, it is persuasive that Fischer does not explicitly teach that the data processing system itself makes the determination that selected information is no longer required, as the claims are now amended.

3. Claims 1, 8, 12, 13, 14, 21, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer (US 2002/0010638) in light of Wallace et al (Wallace), US 6,968,317, 22 November 2005.

Official Notice is taken that it was well known in the art at the time of the invention that a data processing system can make a determination that selected information is no longer required, rather than requiring a user to actively make that determination. Evidence of this is provided by Wallace [COL 1 lines 48-60], where the system removes restrictions that correspond to selected information no longer required for a transaction.

It would have been obvious to one of ordinary skill at the time of the invention to have the system make the determination to remove the selected information because it expedites the process of on-line transactions [Wallace Col 1 lines 61 and after].

As to **claim 1**, Fischer teaches a method in a data processing system (see FIG 1) for managing information (i.e., e-commerce sales) comprising:

receiving information from a plurality of users; (see FIG 1. The users are buyers who input information in the form of orders for goods. Multiple users reside in the system.)

storing information to form stored information (the order from the user is stored information stored at the user's computer and is sent by e-mail to the vendor. See steps 52 and 54 in FIG 4)

receiving a request to remove selected information from the stored information from a user within the set of users (step 64 in FIG 4, "review order"), wherein the selected information is received in response to a transaction involving the user (the selected information derives from a user order, which is readable as a transaction by the user)

responsive to receiving the request, determining by the data processing system if the selected information is no longer required for the transaction (step 66 in FIG 4, decision is made to augment or change order, which includes deleting items, see page 3, column 1, line 8) While Fischer does not have the system remove the information, Wallace does [COL 1 lines 48-60].

responsive to the selected information no longer being required for the transaction, removing by the data processing system the selected non-required information about the stored information (step 68 in FIG 4, modify the order)

The elements of claims **8, 12, 13, 14, 21, 24 and 25** are rejected in the analysis above and these claims are rejected on that basis.

4. Claims 2-7, 10, 15-20, 23, and 27-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Amsbury whose telephone number is 571-272-4015. The examiner can normally be reached on M-F 6-18:30 FIRST WEEK.
